

ProShare

COLLABORATIVE FILE SHARING

WHY WE USE PROSHARE

Unlike most consumer-grade file sync services, such as Dropbox, ProShare keeps business files safe by arming administrators with robust security and control features. Business clients can limit or control which devices are permitted to sync; completely audit file syncs and changes; remotely wipe data from devices that are lost or stolen; and monitor and manage how employees are using their mobile devices.

POWERED BY

alliance  **solutions**
PARTNERS

ProShare provides file sync between PCs and mobile devices. ProShare enables business users to sync sensitive corporate files between laptops, desktops, smartphones, tablets, and the web. ProShare makes it possible for users to access all of their files on any device and to collaborate with colleagues, clients, and business partners.

PRODUCT FEATURES

- ProShare unleashes the power of mobility and maximizes the Bring Your Own Device (BYOD) trend.
- Despite a diverse computing environment, ProShare lets users be productive with their files, while giving essential control and visibility to administrators and business owners.

For more information on products and configurations, feel free to contact the offices of Alliance Solutions Partners.
